

Dr. R.B. Grover

Member, Atomic Energy Commission,
Chairman, BRNS

Chairman, Nuclear Group, India Energy Forum
Distinguished Professor Emeritus, HBNI

Indian Nuclear Society cordially invites you to the Webinar on
“The legislative framework for nuclear energy in India”

Saturday, 10 January, 2026 11:00 Hrs

The SHANTI Act (Sustainable Harnessing and Advancement of Nuclear Energy for Transforming India Act, 2025) is India's landmark legislation overhauling its nuclear framework. The Act consolidates regulation, enforcement, civil liability, and dispute resolution within a single statute. It enables private sector participation in building and operating nuclear power plants, but core functions remain with the Central Government. It separates permission to establish a facility from that to operate it safely, requiring both a license and safety authorisation. Sufficient guardrails have been embedded in the Act to ensure that India continues to manage nuclear science and technology responsibly.

INS Webinar on “The legislative framework for nuclear energy in India” by Dr. R.B. Grover, Member AEC. Saturday, January 10 · 11:00am – 1:00pm Time zone: Asia/Kolkata;
